

SCOPE

A virtual team for primary care providers

GIMRAC/Direct Admit Pathway

What does this pathway provide...

The purpose of this pathway is to support PCPs with access to Hospital Internists who can provide phone advice or direct the patient to the most appropriate hospital resource (ED, GIMRAC, inpatient admission), ensuring patients receive the right care at the right time in the right place

- Access to same-day telephone consultation with the on-call Internal Medicine Physician
- Streamlined referral process to GIMRAC for appropriate patients
- Potential for Direct Admission to hospital if appropriate

What will the SCOPE Nurse Navigator do?

- Forward PCP contact information to on-call GIM for phone consultation
*(GIM will contact PCP between patients)
 - Provide assistance to determine if the patient is appropriate for GIMRAC...if not appropriate, NN will assist to find appropriate Specialist or resources
 - Confirm requirements for referral to clinic are met and forwarded to GIMRAC
 - Relay the patient appointment through Ocean e-Referral to ensure continuity, and support for the EMR (patient may receive their appointment time/date if connected through email)
- * **Please Note:** All appropriate Patient Demographics will be forwarded to GRH booking to create an "event" for documentation, billing and data collection

*Nurse Navigator contact information:

Ocean e-Referral: **St. Mary's KW4 SCOPE Program GRH/SMGH**

Phone: **226-972-5025**
